Note:

This visualization showcases a total sales figure of \$118.73 million and a total profit of \$16.89 million. The first graph allows you to view total sales, COGS, and total profits by using the buttons at the top of the bar chart. The treemap provides a breakdown of sales by country, and slicers at the top of the graphs are available for filtering the details. The second page includes a line chart, scatter chart, and clustered bar chart for various analyses. The third page features pie and donut charts, displaying sales percentages by segment and country. The first of the two line charts shows the total units sold in the years 2013-2014, allowing us to assess the number of units sold each month. The second and final line chart displays the profit and total sales for the same period, with the gap between the profit line and sales line indicating the trend line.
